AQUAGENESI

Metric Size Fitting / Inch Size Fitting / Large Size Fitting

- One-touch type enabling easy to attach and detach, safe use
- Cork-type allowing excellent sealing function and high durability against leakage
- Made of FDA-approved material ensuring its safety, certified as NSF 51, 61
- Food and beverage fittings with oval sleeves

Check Valves

Non-return valve that allows fluid to flow only in one direction
Usable for water, food and beverage
Compact size for convenient use in narrow spaces
Easy to install and convenient to use

Flow Control Valves

Valve that discharges constant flow by controlling small flow rate
Usable for water, food and beverage
Flow rate increase / decrease controller available under any spatial changes
Securable stability under any temperature changes

Ball Valves

Valve to open and close the supply of compressed air and water
Usable for air and water, convenient for use in confined spaced
Size-adjustable to fit in the hose and securable to valid cross sectional area as hose size

Filter Strainers

Usable for water, food and beverage
Filter out fine impurities with stainless steel filter net
Easy filter installation and replacement

STEELFIT

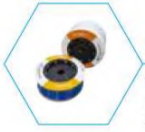
Nut and holder with two O-rings provide a stronger seal
Allowing the use of stainless pipe or similar tube

Cartridges

Effectively inserting and using a counterpart with a cavity in the counterpart
Composed of half & full cartridges made of acetal and brass materials

Accessories

Usable for water, food and beverage
Made of FDA-approved material ensuring its safety, certified as NSF 51, 61



Tube

Water purifier, coffee machine, food and beverage hose
Available for various range of temperatures and pressures
Excellent chemical durability
Compliance with FDA standards

Έκδοση | Edition: 21.10.2026

Applications and Features

- Our products are designed for water, food and air contact but can be used with selected gases, vacuum & liquids
- A single action allows the tube to release and connect easily, saving time and expense
- Our products are made of NSF approved non-toxic materials
- Various uses depending on the user 's environment and application

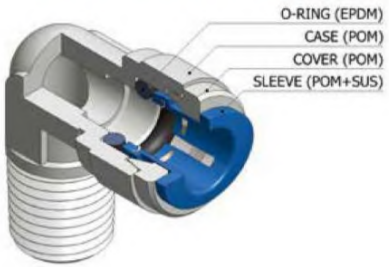
Specifications

- Our products are designed for water, food and air contact
- Fluid type : Water, Beverages
- Working pressure : 0~230PSI / 0~16kgf/㎠
- Working temperature : 34~140° F / 0~60°C
- Applicable Tube : Polyethylene(PE), Polyamide(PA), and Polyurethane(PU)
- Reference data(next page)

Structural Diagram



Naturally high-quality, improved by technology.

▪ Temperatures and Pressures indicated refers to NSF standards limits, Please contact our technical department for higher temperature and /or pressure application.
▪ System perfomances always depend from fittings, tubes and possible other items and accessories used.
It is a responsability for users to cross check the technical characteristics of each single component

Connection & Disconnection

Use a tube cutter when connecting.

2 Insert the tube into the fitting fully up to the tube stop.

3 Pull the tube to check its security.

4 After pulling the tube, insert the clip between body and sleeve

5 Push back the tube one more time to check it is secure. The usage of clip is to prevent the tube pulling-out and the shaking.

6 Check the system pressure before pulling out the tube. Remove the clip before removing the tube.

7 To remove the tube press, hold collet while pulling out the tube.

POLYETHYLENE TUBE

Our tube is made of Linear Low Density Polyethylene (LLDPE) and tube can be used for wide range of temperature and pressure suitability. Fluidfit tube is NSF & ACS certified for the requirement of water & food applications

Applications

- water purification, water conditioners, ice makers, misting systems and food contact application

Features

- A wide range of temperature and pressure suitability
- Broad chemical compatibility
- PE tubing is made from FDA compliant and non contaminating materials

Specifications

- Tube Tolerance :+0.1mm/-0.1mm
- Temperature : -20°F(-29°C) ~ +150°F(66°C)
